

# 5 Facts on Automated Vaccine Health Tracking

A More Efficient Way to Keep Your Business Safe

## 1

### Automated Tracking is Highly Adaptable

Going digital provides an easy way to make necessary changes. New variants are likely to arise and requirements are quickly shifting, making adaptability a key to success.

Vaccine and health tracking are the best way to keep workplaces and families safe.

## 2

### Automation Creates Fewer Errors

Automation means fewer human touchpoints and fewer chances for bad data inputs. Workflows tend to use digital forms, allowing you to require fields to ensure no information gets missed.

**ERROR**  
Oops!

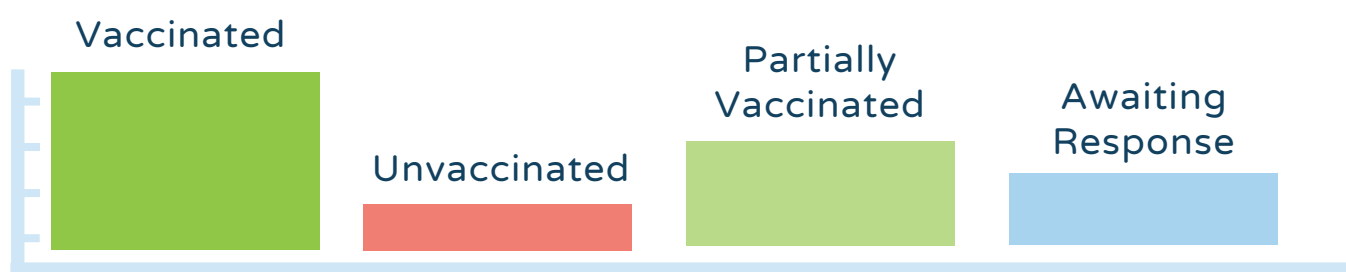

**77%** of companies believe inaccurate data had led to revenue loss.

## 3

### Automation Creates Greater Visibility

Track workflow progress for a better pulse check on employee health. Email tracking lacks the ability to provide quick insight and often requires digging to find the right thread.

### A Secure System Provides Enhanced Security & Confidentiality

## 4

A top concern for most businesses is staying in compliance and keeping data secure. The right automated tracking system will ensure your employee health data is stored properly, and the right personnel have access to files, unlike email or paper-based tracking.

Did you know:

Asking employees for their vaccine status is NOT a HIPAA violation, but health information collected should still be secured under HIPAA requirements.

## 5

### Automated Tracking is Scalable to Grow with Your Brand

Email tracking and makeshift solutions can work, but only to a certain point. As your business continues to grow, having a system that is flexible and easily scalable matters.
